

getUUID::execute

setUUID::execute

UUID\_MANAGER::get\_UUID  
\_EEPROM

```
graph LR; A[getUUID::execute] --> C[UUID_MANAGER::get_UUID _EEPROM]; B[setUUID::execute] --> C;
```

The diagram illustrates a mapping from two source methods to a single target method. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'getUUID::execute' and the bottom box contains 'setUUID::execute'. Blue arrows point from the right side of each of these boxes to a single gray rectangular box with a black border on the right. This gray box contains the text 'UUID\_MANAGER::get\_UUID' on the top line and '\_EEPROM' on the bottom line.
